

incode

Scale into Your Digital Future with Identity Verification

Used by global financial institutions, available for you

Given the increasing need to offer remote onboarding, online identity verification for your customers is a must-have. Incode's omnichannel biometric identity platform is a customer focused and fully automated platform that gives seamless access across digital and physical channels with products focused on remote onboarding, document capture and verification, authentication, and payment verification.

Create the future customer experience with Incode by securely verifying remote users while streamlining the onboarding process and effortlessly meeting global KYC and AML requirements. And do so while increasing revenues and drastically reducing fraud.
